

WEB DEVELOPER

Metropolitan Area Planning Council, Boston
June, 2013

***This position has been reposted with adjusted requirements and salary.
Applicants who applied to the previous posting need not reapply.***

The Metropolitan Area Planning Council's Data Services Department seeks a Web Developer to program leading-edge civic applications in support of sustainable regional planning. This position will be responsible for designing, producing and managing projects involving spatial and statistical data on the web to support MAPC's policy initiatives and planning efforts. Applicants must have both deep technical knowledge of the web and a strong record of user experience and design.

A list of current projects can be found under MAPC's GitHub account:
<https://github.com/MAPC>

Duties include creating user interfaces for custom web applications with HTML, CSS and JavaScript; develop Python based server side applications; configure and manage Linux servers. The following are required qualifications for the position: BA in planning, public health, economics, computer sciences, or a related field and at least 2 years of experience in a related field; demonstrated proficiency with JavaScript, HTML and CSS; data visualization and mapping; experience with open source mapping tools like GeoNode/ GeoServer, Mapnik or TileMill. Full time position, salary range: \$65,000 - \$70,000, depending on qualifications. Excellent state employee benefits package. The position is open until filled. Interested candidates should submit a cover letter, resume and three references as well as links to online projects if available, and a cover letter noting your interest in civic technologies and provide, as well, a link to your GitHub (or similar) account. Candidates must have legal authorization to work in the USA and a valid driver's license and/or the ability to arrange transportation to meetings in different parts of the region. MAPC is an EOE/AA employer. Diverse candidates are strongly encouraged to apply.
